

Jakub Duda

I am a person who is highly motivated to learn programming. So far I was programming just for my own pleasure and satisfaction or to complete university projects. I am currently focused on my advancement towards becoming a front-end developer. I attend a professional course and spend most of my free time on self-improvement in this field. During internship I would like to enhance my skills and practice the abilities which I have already acquired in order to do projects as well as it is possible.

Experience

| | |
